SUMMARY

Aspiring Full Stack Developer dedicated to building and deploying functional, compelling web applications. My technical foundation is TypeScript, with a core focus on React for frontend development and Node.js with Express for backend services. I extend this foundation with cloud deployment experience across Amazon Web Services and Microsoft Azure with industry standard of DevOps practices.

SKILLS

- **Frontend:** HTML, CSS, Javascript, TailwindCSS, React, Shadcn, MaterialUI, Design Systems
- **Backend:** Node.js, Express, ASP.NET WebAPI, Docker, Lambda, Nginx
- **Database:** MySQL, PostgreSQL, MongoDB, DynamoDB
- **Programming Language:** Java, Python, Typescript, C#
- **Tools:** Git, Github, Postman, Swagger, MCP, Skills, Claude Code, Copilot, Antigravity
- **Cloud:** Supabase, Vercel, Heroku, Azure, AWS, Terraform, Serverless, EC2, VPS

EXPERIENCE

Cloud Infrastructure Department Head

Microsoft Student Community QCU | June 2026 – Present

- Automated Azure and GitHub resource provisioning using Terraform, including isolated staging environments
- Created and managed [github organization](#) account for 9 teams and 50+ students.
- Architected MSC-QCU project on Microsoft Azure using Azure Functions and Storage Accounts for serverless compute and data storage

ACADEMIC PROJECTS

Schatzies Events Management System | [Website](#)

React TS | NodeJS | DynamoDB | AWS

Full-Stack Developer head, AWS Cloud Admin

- Integrated serverless frontend and backend using Swagger, resulting in synchronized API contracts and fewer integration errors.
- Established CI/CD workflows with staging and production environments, resulting in tested, reliable deployments before release.
- Provisioned and deployed infrastructure using AWS CloudFormation, for services such as S3, CloudFront, Lambda, and DynamoDB, resulting in a fully automated, scalable cloud deployment.

Flowboard: Project Management System | [Website](#)

React TS | ASP.NET | MongoDB | Azure

Full-Stack Developer Head, Azure Cloud Admin, UI-UX Designer

- Initiated and led development of a drag and drop project management system using React TypeScript and Fluent UI, resulting in flexible task tracking compared to static spreadsheets.
- Designed repository structure, local development setup, and CI CD using GitHub Actions, resulting in consistent builds and automated deployments across the team.
- Migrated deployment to Microsoft Azure and MongoDB Atlas for database, resulting in a scalable environment aligned with cloud deployment patterns.

EDUCATION

Quezon City University

Bachelor of Science in Information Technology

Expected Graduation: July 2027

673 Quirino Highway, San Bartolome, Novaliches, QC

CERTIFICATIONS

- Google AI Professional Certificate - Google
- Github Foundations - Microsoft
- AWS Technical Essential - AWS Educate
- Microsoft Azure Fundamentals – Datacamp
